Patient Information

Physician Information

Name: **EXAMPLE PATIENT**

Test Agency

Gender: M

601 BioTech Dr Suite 301

Patient MRN: EXAMPLEMRN

North Chesterfield, VA 23235

(844) 347-2643

AsparaginaseCanine

The asparaginase activity is:

138 mIU/mL

Assay Methodologies and Limitations of Asparaginase™

Asparaginase Enzyme Activity Quantification Assay utilizes a spectrophotometry/absorbance-based enzyme-coupled kinetic reaction. Measurements of unknown samples are made against a standard curve generated from E. coli L-asparaginase with each run. Since Asparaginase concentrations can vary widely from patient to patient there is no reference range for this assay.

This test was developed and the performance characteristics determined by Granger Genetics. The assay has not been cleared or approved by the FDA. The laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for clinical purposes. It should not be regarded as investigational or for research.
